Professional Experience

Founder & Product Engineer Jaipur, Rajasthan, India
RankShoot Mar 2026 – Present

- Built an AI-powered SEO automation platform using Next.js, React, Node.js, PostgreSQL, and LLM APIs, automating keyword research, content generation, and publishing workflows.
- Developed agent-based content pipelines capable of generating blogs, metadata, FAQs, and internal links, reducing manual content production effort by over 80%.
- Designed and deployed the complete product architecture, including authentication, analytics, billing, and cloud infrastructure, serving multiple beta customers.

Software Engineer Jaipur, Rajasthan, India
Cadence Pro Inc. Mar 2025 – May 2026

- Revamped the flagship AI chatbot using React, TypeScript, and Tailwind CSS, improving maintainability and reducing UI development effort through reusable component architecture.
- Implemented Slack and GitHub integrations using OAuth, webhooks, and REST APIs, enabling seamless chatbot access across engineering workflows.
- Built real-time mention and autocomplete functionality using trie-based search and developed multi-agent AI workflows using LangGraph and LangChain for project planning automation.

Frontend/MERN Developer Intern Bangalore, India (Remote)
HireQuotient Jun 2024 – Feb 2025

- Built and maintained 60+ AI-powered web applications using React, Next.js, Node.js, MongoDB, and OpenAI APIs.
- Developed high-traffic products including an AI Resume Builder and SEO-focused content tools, contributing to growth from 40K to 800K monthly organic visits.
- Improved content operations by integrating Strapi CMS and reusable frontend architecture, reducing feature development time by approximately 35%.

Education

The LNM Institute of Information Technology Sept 2020 – May 2024
B.Tech in Mechanical Mechatronics Engineering

Personal Projects

Portfolio Website (Self-Hosted)

- Designed and implemented a personal portfolio site using Next.js and Tailwind CSS; improved Lighthouse performance metrics to 98+.
- Deployed on Vercel with automated CI/CD via GitHub Actions.
